## GAERNE EPS LIGHTWEIGHT FULL CARBON SOLE 12.0

Ultra light and ultra thin, the optimised carbon fiber weave ensures every watt of power is transferred to the pedals. The stability of the foot is increased thanks to the shape of the sole in the plantar arch area. Four air vents guarantee ventilation inside the shoe. The sole has an anti-slip insert in the toe and an interchangeable pad in the rear. Cleat position options have been increased by 9mm compared to the previous sole. An alignment scale printed on the sole allows you to memorize the position of the cleat. Outstanding stiffness index of 12.

In fibra di carbonio intrecciato, leggera e ultra sottile, garantisce il trasferimento di ogni watt di potenza sui pedali. Il piede risulta altresì più stabile grazie alla conformazione della suola nella zona dell'arco plantare. Quattro prese d'aria garantiscono l'aerazione all'interno della calzatura. La suola presenta un inserto antiscivolo nella punta e un tacchetto intercambiabile nella zona posteriore. È possibile arretrare la posizione della tacchetta di 9 mm rispetto allo standard precedente. Una scala di allineamento stampata sulla suola consente di memorizzare la posizione della tacchetta. Indice di rigidità della suola pari a 12.

In geflochtenen Carbonfasern, leicht und ultra-dünn, sorgt für die Übertragung von jedem Watt Leistung auf die Pedale. Der Fuß ist dank der Form der Sohle im Bereich des Fußsohlenbogens auch stabiler. Vier Lufteinlässe garantieren die Belüftung im Schuh. Die Sohle hat einen Anti-Rutsch-Gummi an der Spitze und eine austauschbare Absatzplatte. Es ist möglich, die Position der Schuhplatte um 9 mm zu verschieben. Durch eine auf der Sohle aufgedruckten Ausrichtungsskala können Sie sich die Position der Schuhplatte merken. Steifigkeitsindex der Sohle :12.

### GAERNE EPS LIGHT WEIGHT FULL CARBON SOLE 10.0

STIFFNESS  
6 7 8 9 **10** 11 12

The full carbon sole "GAERNE EPS LIGHT WEIGHT FULL CARBON SOLE 10.0" guarantees absolute lightness and rigidity. The ultra-thin thickness of the carbon allows the foot to be positioned at a minimal distance from the pedal, thus allowing maximum power whilst pedaling without loss of energy. Two channels positioned in the sole ensure perfect ventilation to the foot during use. Non-slip rubber inserts in the front and back of the sole provide security whilst walking. The rear insert is replaceable. Sole is compatible with all clipless pedals.

La suola in full carbon "GAERNE EPS LIGHT WEIGHT FULL CARBON SOLE 10.0" garantisce assoluta leggerezza ed un'elevata rigidità, inoltre lo spessore ultra-sottile, consente al piede di posizionarsi ad una distanza minima dal pedale, esaltando al massimo la spinta del piede durante la pedalata, senza dispersioni di energia. Due canalizzazioni posizionate sulla suola garantiscono una perfetta ventilazione del piede durante la corsa. Inserti di gomma antiscivolo nella parte posteriore e anteriore della suola, offrono sicurezza durante la camminata. L'inserto posteriore è intercambiabile. Suola compatibile con tutti i pedali a sgancio rapido.

Die Vollcarbon-Sohle "GAERNE EPS LIGHT WEIGHT FULL CARBON SOLE 10.0" garantiert absolute Leichtigkeit und Steifheit. Das ultra dünne Design erlaubt einen minimalen Abstand des Fusses zum Pedal - maximale Kraftübertragung ohne Energieverlust. Zwei Luftkanäle in der Sohle gewährleisten perfekte Lüftung des Fusses während der Verwendung. Rutschfeste Gummis vorne und hinten bieten Sicherheit beim laufen. Der hintere Absatz ist auswechselbar. Sohle kompatibel mit allen Rennrad-Pedalen.

### GAERNE EPS CARBON POWER SOLE 8.0

STIFFNESS  
6 7 8 9 **10** 11 12

GAERNE EPS CARBON POWER SOLE 8.0 is made of nylon enriched with carbon to grant optimum rigidity. The thin thickness guarantees a round pedaling without energy dispersion. The stability of the foot is increased thanks to the shape of the sole in the plantar arch area. Five air vents guarantee ventilation inside the shoe. The sole has an anti-slip insert in the toe and an interchangeable pad in the rear. An alignment scale printed on the sole allows you to memorize the position of the cleat. Cleat position options have been increased by 9mm compared to the previous sole. Compatible with most available quick-release pedals. Outstanding stiffness index of 8.0.

GAERNE EPS CARBON POWER SOLE 8.0 è realizzata in nylon arricchito con carbonio per garantire un'ottima rigidità. Lo spessore sottile garantisce una pedalata rotonda senza dispersioni di energia. Il piede risulta altresì più stabile grazie alla conformazione della suola nella zona dell'arco plantare. Cinque prese d'aria garantiscono l'aerazione all'interno della calzatura. La suola presenta un inserto antiscivolo nella punta e un tacchetto intercambiabile nella zona posteriore. Una scala di allineamento stampata sulla suola consente di memorizzare la posizione della tacchetta. E' possibile arretrare la posizione della tacchetta di 9 mm rispetto allo standard precedente. Suola compatibile con tutti i pedali a sgancio rapido. Indice di rigidità della suola pari a 8.0.

Die GAERNE EPS CARBON POWER SOLE 8.0 besteht aus Carbon angereicherterem Nylon, um eine optimale Steifigkeit zu gewährleisten. Die geringe Dicke garantiert ein rundes Treten ohne Energiedispersion. Die Stabilität des Fußes wird durch die Form der Sohle im Plantarbogenbereich erhöht. Fünf Belüftungsöffnungen sorgen für Belüftung im Schuh. Die Sohle hat einen Anti-Rutsch-Einsatz im Zehenbereich und ein austauschbares Pad im hinteren Bereich. Eine Ausrichtungsskala auf der Sohle ermöglicht, die Position der Schuhplatte zu speichern. Die Optionen für die Stollenposition wurden im Vergleich zur vorherigen Sohle um 9mm erhöht. Kompatibel mit den meisten verfügbaren Schnellwechsel-Pedalen. Hervorragender Steifigkeitsindex von 8.0.

**Innovation, vision, passion for new challenges.** Designed and developed with the experience we gained from 60 Years of Experience, for who strives for success! Superior comfort and max power transfer define our latest lightweight, high-performance Carbon G.Stl road shoes.

### The IN FIT CLOSURE SYSTEM

Features six fixing zones providing infinite adjustment and a precision fit

BOA's new, breakthrough platform brings a sleek, low-profile design, unprecedented durability, and improved sustainability. With micro-adjustability, Li2 is the ultimate in fast, effortless, precision fit.

### THE BOA GUARANTEE

Boa Technology guarantees the reels and the cables of the BOA fit system for the entire useful life of the product

### THE ANATOMIC HEEL CUP 1.0

With its revised shape and internal non-slip treatment allows improved stability and the best foot control. Combined with the TARSAL SUPPORT SYSTEM 1.0 which surrounds the heel and shapes the shoes' upper to the riders foot profile, these two technologies work together for unmatched power transmission and control.

**FIT TONGUE 1.0** Utilizing a variable thickness on its longitudinal and transverse section, obtained thanks to the seamless construction technique. Internally it is built with a high-tech cushion layer and is perforated for optimal breathability.

### AIR VENTILATION SYSTEM

The shoe provides excellent breathability and aides in sweat evaporation to grant a perfect climate

# Michelin® Soles

POWERED BY MICHELIN® TECHNICAL SOLES

## GAERNE EPS LIGHT WEIGHT CARBON FIBER MTB SOLE 10.0

Gaerne technology combined with the know-how of Michelin's designers and technicians, gave birth to the new EPS Light Weight Carbon Fiber Mtb sole 10.0, offering the right mix of performance, durability, strength and lightweight. Its structure is made up of carbon to provide excellent stiffness and power in pedaling. Michelin rubber tread combines a compound designed to balance performance and abrasion resistance also in extreme conditions – with a design profile which allows for excellent hold and traction. The large distance between the treads allows better self-cleaning and instant mud shedding. For the riders who need even more grip, two holes in the toe cup allow the fixing of screw-on and interchangeable cleats, available in different colours. Tested by the best bikers, this sole represents the pinnacle in terms of technology, innovation and functional quality.

La tecnologia Gaerne, unita al know how dei designer e tecnici di Michelin, ha dato origine alla nuova suola da Mtb EPS Light Weight Carbon Fiber 10.0, in grado di offrire il giusto mix di performance, durabilità, supporto e leggerezza. La struttura è realizzata in carbonio per un'ottima rigidità e potenza della pedalata; il battistrada gommato Michelin abbina ad un compound pensato per conciliare prestazione e resistenza all'abrasione, anche in condizioni estreme, un design dei tasselli che consente di ottenere una presa e una trazione ottimali, l'ampia distanza tra un tassello e l'altro è funzionale a una maggior autopulizia e allo scaricamento istantaneo del fango. Per i rider più aggressivi, due alloggiamenti nella punta, predisposti per l'inserimento dei tacchetti, avvitabili e sostituibili in diversi colori. Testata dai migliori bikers rappresenta il massimo in termini di tecnologia, innovazione e qualità funzionale.

Gaerne-Technologie kombiniert mit dem "Know-how" von Michelins Designern und Technikern, hat uns zur Entwicklung der neuen EPS-Light Weight-Carbon MTB Sohle 10.0 geführt, die in der Lage ist, die richtige Mischung aus Leistung, Haltbarkeit, Kraftübertragung und Leichtigkeit zu bieten. Ihre Struktur besteht aus Carbon, um hervorragende Steifigkeit und Kraft aufs Pedal zu bringen. Michelins Gummi-Laufflächen ermöglichen eine Verbindung, aus Leistung und Abriebfestigkeit - auch unter extremen Bedingungen. Das Stollen-Profil, steht für hervorragende Halt und Traktion. Der große Abstand zwischen den Profilssegmenten ermöglicht eine noch bessere Selbstreinigung. Für ambitionierte Fahrer ist es möglich in der Zehenschale auswechselbare Schraubstollen zu befestigen, die in verschiedenen Farben erhältlich sind. Von den besten Bikern getestet, repräsentiert diese Sohle die neueste Spitzentechnologie, mit Innovation und funktionaler Qualität.

# Mtb Soles

## GAERNE MTB 2DENSITY SOLE 7.0

Direct from the Research and Development Team at Gaerne comes the "MTB 2DENSITY SOLE 7.0". A new sole designed specifically for Mountain Bike use. The structure of the sole combines both nylon and fiberglass materials, making it durable, lightweight and thin. The tread has been designed to ensure maximum grip/stability and has an excellent resistance to varying types of terrain. Two removable front studs give this shoe improved traction in variable and muddy terrains.

Dal Centro Ricerca e Sviluppo Gaerne nasce "MTB 2DENSITY SOLE 7.0" una suola progettata appositamente per la MTB. La struttura è realizzata in nylon e fibra di vetro, che la rendono resistente, leggera e sottile. Il battistrada è disegnato per garantire il massimo dell'aderenza, della stabilità e un'ottima resistenza su ogni tipo di terreno. Due alloggiamenti nella punta, predisposti per l'inserimento dei tacchetti avvitabili consentono di migliorare la presa sui terreni sterrati e fangosi.

Aus der Forschungs- und Entwicklungsabteilung von Gaerne kommt die brandneue "MTB 2DENSITY SOLE 7.0" speziell für Mountainbikeschuhe. Der Aufbau aus Nylon und Fiberglass macht die Sohle leicht, steif, dünn und widerstandsfähig. Das Design der Lauffläche gewährleistet besten Grip und exzellente Stabilität in jedem Gelände. Zwei herausnehmbare Spikes steigern die Traktion in schlammigem Gelände.

### NAILS - INSTRUCTIONS

In order to improve the performance of the footwear in extreme conditions, such as snow, mud and rocky terrain it is recommended to apply the nails/studs to the MTB sole. For the application please remove the two screws on the front of the sole and replace with the two nails/studs and tighten.

BOA's new, breakthrough platform brings a sleek, low-profile design, unprecedented durability, and improved sustainability. With micro-adjustability, Li2 is the ultimate in fast, effortless, precision fit.

**THE BOA GUARANTEE**  
Boa Technology guarantees the reels and the cables of the BOA fit system for the entire useful life of the product

**THE ANATOMIC HEEL CUP 1.0**  
With its revised shape and internal non-slip treatment allows improved stability and the best foot control. Combined with the TARSAL SUPPORT SYSTEM 1.0 which surrounds the heel and shapes the shoes' upper to the riders foot profile, these two technologies work together for unmatched power transmission and control.

**FIT TONGUE 1.0** Utilizing a variable thickness on its longitudinal and transverse section, obtained thanks to the seamless construction technique. Internally it is built with a high-tech cushion layer and is perforated for optimal breathability.

**AIR VENTILATION SYSTEM**  
The shoe provides excellent breathability and aides in sweat evaporation to grant a perfect climate

**ANTI-ABRASION** reinforcement on the points of greatest contact of the upper.

# Carbon G.Snx

**Innovation, vision, passion for new challenges.** Designed and developed with the experience we gained from 60 Years of Experience, for who strives for success! Superior comfort and max power transfer define our latest lightweight, high-performance Carbon G.SNX Mtb shoes.

**The precision of every detail, designed for the off-the-radar performance.**  
Meticulous research into refined materials and brand new technological solutions makes for incredible performance.

## DUAL FITTING CLOSURE SYSTEM

Two independent BOA Dial Z allow to obtain a precise, fast and personalized closure without any pressure point

## SPEED, PRECISION, PERFORMANCE, MOTION.

Premium aerodynamic dial design to integrate with cycling shoes for uncompromised performance and to deliver precision fit, directional grips optimized and combined with the rubberized finish, makes it more effective grip.

## THE BOA GUARANTEE

Boa Technology guarantees the reels and the cables of the BOA fit system for the entire useful life of the product

## TARSAL SUPPORT SYSTEM

To ensure the perfect position of the foot inside the shoe, obtaining a rounded and more efficient pedal stroke.

## INTEGRATED ANTI SLIP HEEL CUP

The integrated anti slip heel-cup allows for the best foot stability and power transmission. Internal non-slip treatment secures optimal foot positioning.

## AIR VENTILATION SYSTEM

The shoe provides excellent breathability and aids in sweat evaporation to grant a perfect climate

## EPS LIGHT WEIGHT CARBON

Fiber Mtb sole provides excellent stiffness and power in pedaling. It combines a compound designed to balance performance and abrasion resistance, with a design profile which allows for excellent hold and traction.
